Cognition and learning				
What you will see (The difficulty/barrier, how this presents and the	What can help (Provision – stratogies, interventions and resources)	What have		
impact on the learner)	(Frovision – strategies, interventions and resources)	you theu!		
 Difficulties with learning (where, despite appropriate approaches and interventions and developing understanding of the learner's needs, the rate of progress is reducing or static and the gap between same age peers with a similar starting point is increasing). Learners will have much greater difficulty than their peers in acquiring basic literacy and numeracy skills and in understanding concepts. They may also have associated speech and language delay, low selfesteem, low levels of concentration and underdeveloped social skills Difficulty with: Pace of whole class teaching and learning. Acquiring basic numeracy skills. Understanding basic mathematical concepts e.g. time. Understanding between Who? What? Where? When? How? and Why? questions. Understanding verbal explanations. Memory (short-term, working or longterm). Learning, remembering and using appropriate curriculum vocabulary. You may also see: A lack of confidence and reluctance to take risks with new learning situations. Distractibility, passivity or tiredness. Low self-esteem. High level of dependence on adult support. A tendency to copy peers. Reluctance or inability to ask for help. 	• Assessment through teaching to identify the areas of need in consultation with the learner.			
	Clear and simple instructions, breaking down longer instructions and giving one at a time.			
	Visual timetable.			
	Visual cues and prompts.			
	Social Stories.			
	• Give time before response is needed.			
	• Pre-teaching – e.g. provision of a teacher or TA (overseen by a teacher) to help prepare the learner for the new topic. (Or send home as homework)			
	• Shared next steps – so they know what to expect.			
	• Differentiated resource – teach the curriculum appropriate to the child, not their chronological age.			
	• Small group and individual support.			
	Plan opportunities for success and celebrate those successes.			

Difficulties with working memory:	• Give the 'big picture' and context at the start of a new topic and revisit throughout.	
 Struggles with pace of teaching and learning. Struggles to follow instructions – can do the first step. Easily distracted. Unable to complete homework even if explained and differentiated. Fails to complete tasks. Poor organisation. Copies/follow others. Poor organisation. Appears anxious and/or avoidant of tasks or activities. May not ask for help or is highly dependent on adult support. 	Note-taking as an approach for all.	
	• Provide working walls, word maps, lists, checklists, task boards, templates and storyboards.	
	Visual support/reminders – multisensory approach.	
	• Aim to provide 'check-in' support rather than constant individual attention.	
	• Provide opportunities for repetition and overlearning. • Memory activities and games to support the development of strategies to support memory.	
	• Give the 'big picture' and context at the start of a new topic and revisit throughout.	
 Specific learning difficulties affecting one or more aspects of learning including reading, spelling, writing, handwriting, arithmetic, or mathematical reasoning and/or memory which significantly impacts their ability to learn and demonstrate their learning. (N.B. a small number of children may have a ormal diagnosis/educational determination, for example, dyslexia, dyscalculia or dyspraxia. For all areas of need any provision or support should be provided in line with the needs of the child or young person and is NOT dependant on any formal diagnosis.) Difficulty with (some or all of the following): Auditory processing. Phonological awareness – segmenting and blending phonemes. Decoding words. 	 Acknowledge and encourage good oral contributions whenever possible. 	
	• Metacognition approaches – learning to learn by trying to understand the learner's difficulty and asking them what helps.	
	• Use strategies and approaches recommended in advice from assessments and consultations.	
	Evidence-based interventions to develop skills	
	• Make simple adaptations e.g. font, line spacing, coloured paper, lighting etc.	
	• Encourage the learner to celebrate their strengths and achievements in all areas of life.	
	Reading Allow extra time to read and absorb information.	
	 Reading Avoid asking the child to read in front of others unless they want to. 	

 Difficulties with learning phonics beyond the simple alphabetic code. Reading - Inaccurate or slow. Visual processing. 	Reading	
	 Teach strategies to help track words on the page. 	
	Spelling	
	 Mark written work on content rather than spelling. 	
Poor word recognition skills.	Spelling	
 Writing - requires much effort. Frequent and inconsistent spelling errors. Handwriting and formatting on the page. Copying from a worksheet, screen or board. Acquisition and retention of mathematical errors. 	• Highlight/tick the correct parts of the word rather than errors.	
	Snelling	
	• Provide high frequency word / topic word lists.	
	Shelling	
	• Use inhuilt accessibility features of tablets, phones or lantons e.g. speech to text functions	
Remembering number facts and inability to use		
efficient calculation strategies to solve number	spenng	
problems e.g. counting on fingers rather than using		
number facts.	Spelling	
Mathematical reasoning.	• Use colour to highlight spelling patterns.	
• Working memory.		
	Writing / Handwriting	
 Avoidant or disruptive behaviour when being 	Reduce written homework requirements.	
asked to engage in literacy- or numeracy-based	Writing / Handwriting	
tasks.	• Substitute an alternative task (e.g. work on NESSY or Wordshark) for spelling test.	
 Variation in performance day by day. 	Writing / Handwriting	
 Poor organisation skills. 	 Allow and encourage alternative methods other than handwriting when recording work. 	
 Anxiety when asked to read out loud. 	Writing / Handwriting	
• Poor written expression with a limited quantity of writing when compared to verbal expression.	 Use of a scribe or voice recording for some tasks. 	
	Writing / Handwriting	
	• Teach touch-typing.	
	Writing / Handwriting	
	 Encourage and support word processing for written work where possible. 	
	Writing / Handwriting	
	 Check suitability of chair/desk, posture and paper placement. 	
	Writing / Handwriting	
	 Provide with left/right-handed pens and pencils as appropriate. 	
	Working memory	
	Chunk instructions one step at a time and check understanding throughout task.	
	Working memory	
	Allow extra time for the pupil to write down written instructions or give assistance.	
	Working memory	

Provide and teach how to use working walls word mans lists checklists task hoards templates	
and story boards as appropriate.	
Working memory	
• Provide opportunities for repetition and over-learning.	
Working memory	
• Support pupils to copy from the board allowing extra time or provide a personal copy to have on	
their desk.	
Working memory	
• Aim to provide "check-in" support rather than constant individual attention.	
Working memory	
• Give homework tasks and important instructions in pictoral or written form.	
Working memory	
 Encourage use of different coloured pens to highlight work and provide markers. 	
Mathematics	
 Use manipulatives such as Numicon. 	
Mathematics	
• Talk through number concepts out loud, communicating thinking in a verbal, diagrammatic and	
written form.	
Mathematics	
• Use number games.	
Mathematics	
Use of visual programmes such as Number Shark to target gaps in learning.	
Mathematics	
Follow a structured approach to build understanding of concepts.	
Mathematics	
Acknowledge and encourage good oral contributions whenever possible.	
Mathematics	
 Metacognition approaches – learning to learn by trying to understand the learner's difficulty 	
Mathematics	
and asking them what helps.	
Mathematics	
Use strategies and approaches recommended in advice from assessments and consultations.	
Mathematics	
Evidence-based interventions to develop skills.	
Mathematics	
Make simple adaptations e.g. font, line spacing, coloured paper, lighting etc.	
Mathematics	
• Encourage the learner to celebrate their strengths and achievements in all areas of life.
